PROFILE

Full Stack Software Engineer with 2 years of experience developing cloud-native web applications using Python, FastAPI, AWS Lambda, AWS SAM, Angular, and PostgreSQL. Experienced in designing scalable REST APIs, automating business workflows, and building enterprise solutions for real-time data management. Passionate about Artificial Intelligence, Machine Learning, and cloud technologies, with a strong commitment to continuous learning and delivering impactful software solutions. Seeking opportunities to contribute technical expertise while growing as an AI and Cloud Engineer.

Professional Skills

- Problem Solving
- Analytical Thinking
- Team Collaboration
- Communication
- Adaptability
- Continuous Learning

EDUCATION

Bachelor of Computer Science (B.C.Sc)
UNIVERSITY OF COMPUTER STUDIES, Magway

PROFESSIONAL EXPERIENCE

Full Stack Developer (Myanmar Information Technology)
06/2024 – Present | Yangon

- Designed and developed a cloud-native Energy Management System (EMS) supporting real-time monitoring of telecom tower infrastructure.
- Built scalable REST APIs using FastAPI and AWS Lambda with AWS SAM.
- Developed responsive Angular dashboards for monitoring, reporting, and data management.
- Implemented bulk CSV import/export tools, reducing manual data processing.
- Integrated approval workflows and automated task assignment to improve operational efficiency.
- Collaborated with cross-functional teams to deliver features aligned with business requirements.

Energy Management System (Apollo)
Developed and maintained a real-time EMS for monitoring and managing energy data from mobile phone tower sites. Key features included live data monitoring, automated task assignment, structured approval workflows, and robust data import/export tools. Enabled daily/monthly reporting for internal and client use.
Technologies:
Python • FastAPI • AWS Lambda • AWS SAM • Angular • PostgreSQL

Student Management System (Django + React)
Developed a full-stack Student Management System using Django and React for efficient student record management. Implemented secure REST APIs, responsive CRUD operations, and CSV/Excel import-export with data validation and intelligent update functionality to prevent duplicate records.
Technologies:
Python • Django • Django REST Framework • React • MySQL

SKILLS

Programming

- **Python**
- **JavaScript**
- **PHP**
- **C#**

Frontend

- **Angular**
- **React**
- **HTML5**
- **CSS3**

Backend

- **FastAPI**
- **Django**
- **REST API**

Cloud

- **AWS Lambda**
- **AWS SAM**
- **Docker**

Database

- **PostgreSQL**
- **MySQL**
- **SQL Server**

Tools

- **Git**
- **GitHub**
- **Postman**

AI

- **Machine Learning Fundamentals**

LANGUAGES

- **Burmese (Native)**
- **English (Intermediate)**

Library Management System (C#)
Developed a desktop-based Library Management System using C# and Windows Forms to automate book management, member registration, inventory tracking, and reporting. Integrated barcode scanning and Crystal Reports to improve operational efficiency.

Technologies Used:

- **Frontend:** C# with Windows Forms
- **Backend:** SQL Server / SQLite
- **Tools:** Visual Studio, USB Barcode Scanner

Credit System (Pure PHP)
Developed a credit management system using pure PHP, featuring robust data import/export capabilities. Enabled seamless bulk data handling via CSV format, including advanced import update logic to modify existing records without duplication. Focused on optimizing data integrity, minimizing manual workload, and ensuring system scalability.
Key Features:

- CSV-based import/export functionality
- Import update to overwrite or merge existing entries
- Clean and efficient PHP codebase (no frameworks) Error handling and data validation mechanisms
